

breakfree

with a software based PBX for Windows

Discover the advantages of **3CX software VoIP IP PABX**

[3CX Phone System for Windows](#) is an award-winning software-based [IP PBX](#) that replaces traditional proprietary hardware PBX. It is based on the SIP standard and supports most popular SIP phones, VoIP Gateways, VoIP service providers and PSTN phone lines. It is easy to manage by system administrators as it integrates well with Windows Network infrastructure.

Benefits:

- 3CX Phone System can use the existing network and you can do away with phone cables
- Easier to install and manage via its web-based management console
- Far less expensive than a hardware-based [PABX](#)
- Allows employees to hot-desk and tele-work
- Users can configure their own extensions using the self-service User Portal
- Utilize any SIP phone instead of being locked into one vendor
- Receive and make calls via existing phone lines using VoIP Gateways
- Save on call costs with 'out of the box' configurations for popular SIP / VoIP providers

3CX web-based management console
