NEW!
Version 7.5

With computer viruses, spyware, intrusion attacks, spam and other forms of malicious activities becoming more prevalent, the risk to your computer(s) and private information is amplified. Estimates of the damage caused each year by all the variants of Internet threats run as high as hundreds of billions dollars. To protect themselves, already over 40 million users rely on Grisoft and its award-winning line of AVG software products – and you can, too.

WHAT MAKES AVG SPECIAL

Grisoft solutions are unique in their ability to protect you against more types of threats, whilst being light on system resources and easy to install, configure and use. AVG is respected around the world as high-quality security software with a long history.

Some highlights of AVG include:

- Standard 2-year license policy with an optional 1-year license available
- Unique combination of heuristic analysis and generic detection methods
- Free program updates and versions for the duration of the license
- AVG Admin - Remote Administration
- Automatic high speed updates via professional downloading services
- Professional and rapid 24/7 technical support
- Multilingual in one package
- More than 40 million satisfied users worldwide
- Special discount for educational and charitable organizations
- Attractive renewal prices
- Award-winning, certified solution
- Ease of installation and use
- Light on system resources
- Detection of Potentially Unwanted Programs
- Support for Windows 64-bit Edition
- Single installation package for all products
- Basic and advanced interface for user flexibility
- AVG Update Bulletin – e-mail information concerning the availability of new updates, current virus outbreaks, and other important news
- And much more

Grisoft's AVG software solutions provide reliable protection to homes, offices, small to medium businesses and enterprises of any size. Since its foundation in 1991, the company has achieved rapid growth. Corporate offices are located in Europe and the US, business partnerships are established in UK, Germany, France, Brazil, Australia and New Zealand and distributors are present in many European countries. Grisoft resellers are successfully selling AVG products in more than 170 countries.

AVG Anti-Virus Network Edition

Centrally controlled virus protection for networks.

Reliable antivirus protection

AVG Anti-Virus Network Edition was specially designed for large and small companies to offer maximum antivirus protection and management of workstations. It provides all of the AVG advanced detection methods and components including heuristic analysis, generic detection and detection of Potentially Unwanted Programs and scanning.

Centralized remote administration

The AVG Admin – Remote Administration enables remote installation and updating and management of all workstations and servers. AVG monitors protected clients and provides full statistical reports and outputs. AVG administrates single users, groups, as well as networks of any size; shared settings can be set for users and workstations.

File server protection included

The AVG Anti-Virus Network Edition includes antivirus protection for your file servers. Every file is scanned as opened, executed or copied/saved on the server disk.

Desktop/laptop firewall protection included

In order to enhance your protection, AVG Anti-Virus Network Edition offers centrally administered firewall protection on a workstation level.

Automatic high-speed updates

AVG can be updated automatically as scheduled, or manually when required. Updating AVG is very simple and fast, AVG's small update files (typically, tens of kB) are distributed via high-speed professional downloading services.

Supported platforms

Windows 98/Me/NT/2000/XP(32/64-bit) and NT/2000/2003/2003x64 Server

Supported languages

English, German, Czech, French*, Hungarian*, Italian*, Polish*, Portuguese*, Brazilian, Portuguese*, Spanish*, Serbian*, Slovak*, Danish*, Dutch*, Japanese* (* Language support is platform dependant.)

Licensing

AVG Anti-Virus Network Edition is licensed according to the total number of workstations and file servers combined. License packages: up to 2, 3, 5, 10, 15, 20, 25, 30, 40, 50, 75 and 100. For more information about larger configurations contact us at sales@grisoft.com.

Grisoft's primary focus is to deliver to the market the most comprehensive and proactive protection available. Version 7.5 represents an important milestone in Grisoft's product development, as Grisoft moves from an antivirus provider to a provider of complete security solutions in the home, office and small to medium business segments. Full security solutions for the enterprise segment will follow soon.

AVG Internet Security Network Edition

Centrally controlled complete protection for networks.

Reliable antivirus and anti-spyware protection

AVG Internet Security Network Edition is designed to protect large and small companies. It provides all of the AVG Anti-Virus advanced detection methods and components including heuristic analysis, generic detection and detection of Potentially Unwanted Programs and scanning. The AVG Anti-Spyware component ensures maximum protection against spyware, adware, dialers, keyloggers and worms.

Desktop/laptop firewall protection included

In order to enhance your protection, AVG Internet Security Network Edition offers centrally administered firewall protection on a workstation level.

Sophisticated protection against spam

Being equipped with an antispy engine, AVG Internet Security Network Edition provides fast and accurate spam filtering with a low false positive rate. With heuristic filtering to catch new spam outbreaks and updates released every 5- minutes, AVG offers technology that learns rapidly as spam changes.

Centralized remote administration

The AVG Admin – Remote Administration centralized administrator enables remote installation, updating and management of all workstations and servers. AVG monitors protected clients and provides full statistical reports and outputs. AVG administrates single users, groups, as well as networks of any size; shared settings can be set for users and workstations.

Automatic high-speed updates

AVG can be updated automatically as scheduled, or manually when required. Updating AVG is very simple and fast; AVG's small update files (typically, tens of kB) are distributed via high-speed professional downloading services.

AVG Anti-Malware SBS Edition

Complete virus and spyware protection for networks and email servers.

AVG Email Server Edition

AVG Email Server Edition provides antivirus protection for all major email servers. By running AVG directly on the mail server, protection can be centrally executed and managed. AVG monitors user mailboxes, public groups and MS Exchange server stored databases.

AVG Anti-Malware Network Edition

AVG Anti-Malware Network Edition provides all of the AVG Anti-Virus advanced detection methods and components including heuristic analysis, generic detection and detection of Potentially Unwanted Programs and scanning. AVG Anti-Spyware component ensures maximum protection against spyware, adware, dialers, keyloggers and worms. To enhance your protection, the edition also offers centrally administered AVG Firewall protection on a workstation level.

File server protection included

The AVG Anti-Malware SBS Edition includes file server protection as standard. Every file scanned is opened, executed or copied/saved on the server disk.

Centralized remote administration

The AVG Admin enables remote installation, updating and management of all workstations and servers in networks of any size. AVG Admin provides full statistical reports and outputs.

AVG for SharePoint Portal Server

AVG for SharePoint Portal Server provides complete antivirus protection with simple yet powerful central administration interface. It is extremely fast and light on resources, so, no matter how demanding your users are, it will not slow down their performance.

Supported platforms

Windows 98*/Me*/NT*/2000/XP(32/64-bit) and NT*/2000/2003/2003x64 Server
MS Exchange 5.x/MS Exchange 2000/2003/2007/
Lotus Domino (MS Windows)/Kerio MailServer 5/6
MS Office SharePoint Portal Server 2003/2007
(* antispyware on-access scanner is not supported)

Supported languages

English, German, Czech, French, Italian, Brazilian Portuguese

Licensing

The AVG Anti-Malware for SBS is licensed according to the total number of workstations and servers combined. License packages include one licence for free: up to 5+1, 10+1, 15+1, 20+1, 25+1, 30+1, 40+1, 50+1, 75+1 and 100+1. For more information about larger configurations contact us at sales@grisoft.com.

Licensing

The AVG Internet Security for SBS is licensed according to the total number of workstations and servers combined. License packages include one licence for free: up to 5+1, 10+1, 15+1, 20+1, 25+1, 30+1, 40+1, 50+1, 75+1 and 100+1. For more information about larger configurations contact us at sales@grisoft.com.

BASIC AND ADVANCED INTERFACE

AVG supports two user-friendly interfaces to provide the tools that are right for you. The Basic Interface emphasizes simple control of the application with full administrative functionality. The Advanced Interface is aimed at network administrators who require access to a large network of workstations, more comprehensive information, and detailed configuration overviews and reports.

MANAGEMENT WITH AVG ADMIN – REMOTE ADMINISTRATION

AVG Admin – Remote Administration provides the tools to centrally install and configure AVG clients anywhere in the network, and manage updates from a local Web server or network directory. AVG Admin – Remote Administration is independent of the network (Microsoft, Novell, P2P, etc.) and server architecture, ensuring convenient administration in networks of any size. The tools support remote management of all clients in the local network - allowing the administrator to run tests, trigger virus and program updates, modify settings, and process data. Central administration utilizes the DataCenter, which serves as the communication mechanism for updating client settings, test definitions and other system commands, alerts, and other information.

SOME HIGHLIGHTS OF AVG ADMIN – REMOTE ADMINISTRATION

- Administration of single users, groups as well as networks of any size
- Monitoring protected clients
- Ability to set filters
- Shared settings for users and workstations
- Alert messaging system
- Transparent graphical reports
- Firewall, antivirus, antispymware and antispam configuration support
- AVG Admin – Remote Administration checks, during startup, if a newer version of AVG Admin – Remote Administration is available for download
- AVG Admin – Remote Administration transfers AVG Firewall logs directly from any station in the network
- More detailed information in the Stations overview

SERVICES

Professional and Rapid Technical Support

With all AVG products, technical support is available to all registered users, 24 hours a day, 7 days a week, via email. The Grisoft support staff provides expert consultation with rapid response times. AVG Authorized Resellers are also available to assist you with AVG sales and technical questions.

Professional Customer Support

Please send any sales related questions at sales@grisoft.com. Our sales team will help you to

find a solution that matches your needs the best. Your questions will be answered promptly.

Fully functional Trial Version

Grisoft offers a fully functional Trial Version of all AVG products. For the duration of 30-days you are free to test the AVG performance together with technical support service.

AVG Update Bulletin

AVG Update Bulletin is an optional e-mail information concerning the availability of new updates, current virus outbreaks and spyware threats, spam epidemics and other important news.

AVG FOR LINUX

The AVG product line also includes products specifically designed for the popular Linux and FreeBSD platforms. The AVG for Linux range are truly distribution independent, being compatible with all major distributions, and set the standard for Linux security products.

AVG Anti-Virus for Linux/FreeBSD provides reliable, easy to use award-winning antivirus protection for your home or office computers running Linux/FreeBSD.

AVG File Server for Linux/FreeBSD provides antivirus protection for Linux and FreeBSD file servers. With maximum performance it is light on system resources.

AVG Email Server for Linux/FreeBSD offers comprehensive and reliable antivirus and antispam protection for Linux and FreeBSD powered machines. To ensure maximum security, file server protection is included.

AVG RESCUE CD

AVG Rescue CD is basically a portable variant of AVG based on the Windows PE platform. It is distributed as a bootable CD intended for operating system recovery in such an event where the system cannot be booted normally.

AVG LICENSING MODEL

Grisoft AVG software is sold with a standard 2-year license. If required, an optional 1-year license is available.

Registered users of all AVG commercial products are eligible for the entire duration of their specified license period to:

- all applicable virus, spyware, adware, and spam database updates and program upgrades
- 24/7 technical support via e-mail
- Professional downloading service
- 50% discounted license renewal
- And much more...

AVG Network Editions are licensed according to the total number of workstations and file servers combined, including:

- All workstations on the network
- Workstations that are not running AVG but are connected to a file server that is using the AVG File Server Edition
- Workstations that are not on the network (e.g., remote offices) but have AVG installed on them
- Workstations that are connected to the network only part-time (e.g., notebook computer)

Configurations of 2, 3, 5, 10, 15, 20, 25, 30, 40, 50, 75, and 100 licenses are available, as are larger configurations upon request.

AVG Email Server Edition is licensed according to the total number of mailboxes or e-mail accounts on the servers. The AVG File Server Edition is licensed according to the total number of workstations connected to the file server(s) in the network. Configurations of 5, 10, 15, 20, 25, 30, 40, 50, 75, and 100 licenses are available, as are larger configurations upon request. Both editions are offered with standard 2-year license policy with an optional 1-year license available.

AVG License Increase

License increase represents a growth in the number of licenses for a specific product. When increasing the license, the user specifies the target number of licenses and is invoiced for the difference between the price of licenses already purchased and the price of requested licenses.

During the first half of the license period the difference is paid in full (100 %).
During the second half of the license period, only 50 % of the price difference is paid.

AVG Cross Upgrade

Cross upgrade enables current AVG paid customers to purchase an upgrade to an AVG product of a higher protection level at a discounted price. The number of licenses upgraded must be equal to the number of licenses that you currently have.

AVG License Renewal

At the end of the license period, all registered AVG users are eligible for up to 50 % discounted license renewal for the next period.

AVG Renewal and Cross Upgrade

As renewal time approaches, current AVG users may take the opportunity of this special offer to renew their AVG license and at the same time get additional protection by upgrading to one of our advanced products. The number of new licenses will be the same as the number of original licenses.
