## GPS Fleet Management Tracking Systems can increase the Profitability of your Company

**Reduce Fuel and Maintenance Costs** - The average operating cost per vehicle is about \$1.50 per mile. A company can reduce at least 25 miles per week for each vehicle with a GPS Tracking System.

**Reduce Delay and Time Spent at Unauthorized Locations** - With our software you can not only track but easily establish an alert system for events like a driver going outside of a designated area or staying idle for too long.

**Receive Lower Insurance Rates by up to 35%** - Many insurance companies offer discounted premiums for vehicles that have a Real Time GPS system.

**Reduce Operating Costs** - By monitoring activities like speeding or excessive idling you can not only save fuel, but reduce damage done to the engine, brakes and tires.

**Reduce Overtime** - On average, a company can reduce at least 1 hour of overtime per week with a GPS fleet tracking system.

**Increase Efficiency** - On average, each vehicle could complete at least one extra stop, job, or delivery per week by using the one of our web based systems.

## How Our GPS Fleet Tracking Systems Increase the Productivity of Your Company

**Monitors Routes and Stops** - Idle time and stops at unauthorized locations can become costly for your business; with a GPS system you can ensure that this does not become a problem.

**Eliminates Paper Logs** - The digital record is not subject to human error and makes the process of record keeping more in depth without any additional hassle.

**Detects Side Jobs** - By tracking both real time and historic data you can notice and eliminate suspicious uses of your vehicles by employees.

**Improves Response Time & Customer Service** - By knowing where your vehicles at all times on a real time map, dispatchers can easily send the nearest vehicle when a new job arises. This saves both money and time.

**Monitors Driver Activities** - Many of our systems report all vehicle activity and immediately alert fleet managers by cell phone and email of speeding and unauthorized use of company vehicles.
